

Our Commitment to Quality

AcademySkin™

Developed to Australian Cosmetic Standards

At AcademySkin™, quality is never an afterthought—it is the foundation of everything we create.

Every product within our peptide skincare range is developed using a structured formulation and manufacturing process designed to align with Australian cosmetic requirements and internationally recognised cosmetic manufacturing standards.

From concept through to the finished product, we work alongside experienced cosmetic chemists, formulation scientists and certified manufacturing partners to ensure every formulation is created with safety, quality, stability and performance in mind.

Step 1: Research & Product Development

Every AcademySkin™ product begins with extensive research.

Our development process includes:

- Review of current dermatological and cosmetic science
- Evaluation of clinically recognised cosmetic ingredients
- Selection of evidence-supported peptides and active ingredients
- Assessment of ingredient compatibility and formulation stability
- Identification of ingredients that support healthy skin function

Rather than following trends, we focus on creating formulations with ingredients selected for their cosmetic benefits and compatibility within a complete skincare routine.

Step 2: Formulation by Cosmetic Scientists

Each product is professionally formulated by experienced cosmetic chemists.

During formulation, every ingredient is assessed for:

- Safety
- Stability
- Skin compatibility
- Cosmetic performance
- Texture and sensory feel
- Packaging compatibility

The objective is to produce elegant formulations that provide a premium user experience while maintaining formulation integrity throughout the product's shelf life.

Our Commitment to Quality

Step 3: Manufacturing Under Good Manufacturing Practices (GMP)

AcademySkin™ products are manufactured in facilities operating under internationally recognised cosmetic manufacturing standards, including ISO 22716 Good Manufacturing Practices (GMP) where applicable.

These manufacturing standards help ensure consistency through:

- Controlled manufacturing environments
- Raw material verification
- Batch traceability
- Equipment calibration
- Documented production procedures
- Quality assurance processes
- Hygiene and contamination control
- Finished product inspection

Step 4: Quality Control

Quality assurance is integrated throughout the manufacturing process.

Each production batch undergoes quality control procedures which may include:

- Raw material verification
- Appearance inspection
- pH testing
- Viscosity testing
- Stability evaluation
- Fill weight verification
- Packaging integrity checks
- Microbiological quality testing where appropriate

This process helps ensure every batch meets predefined product specifications before release.

Step 5: Stability & Compatibility Testing

Products are evaluated to confirm they remain stable under expected storage conditions.

Testing may include:

- Accelerated stability studies
- Packaging compatibility assessments
- Temperature stability
- Shelf-life evaluation
- Physical and chemical stability monitoring

These assessments help verify that the formulation continues to perform as intended throughout its expected shelf life.

Our Commitment to Quality

Step 6: Australian Cosmetic Compliance

AcademySkin™ products are developed with consideration of Australian cosmetic regulatory requirements.

This includes compliance with applicable obligations such as:

- Ingredient requirements under Australian industrial chemicals legislation
- Cosmetic ingredient labelling requirements
- Full ingredient declarations using International Nomenclature of Cosmetic Ingredients (INCI)
- Batch identification and traceability
- Appropriate storage and use instructions
- Responsible cosmetic marketing and labelling

Our products are intended for cosmetic use only and are not marketed as therapeutic goods.

Step 7: Premium Packaging

Packaging is selected not only for aesthetics but also to help maintain product quality.

We prioritise packaging that offers:

- Protection from light and air where appropriate
- Improved product stability
- Hygienic dispensing systems
- Reduced contamination risk
- Premium presentation
- Sustainability considerations where practical

Step 8: Continuous Improvement

Innovation is an ongoing process at AcademySkin™.

We continually review:

- Emerging cosmetic science
- Ingredient innovations
- Advances in peptide technology
- Manufacturing developments
- Customer feedback
- Product performance

This commitment allows us to refine our formulations and continue delivering high-quality skincare that reflects current scientific understanding.

Our Commitment to Quality

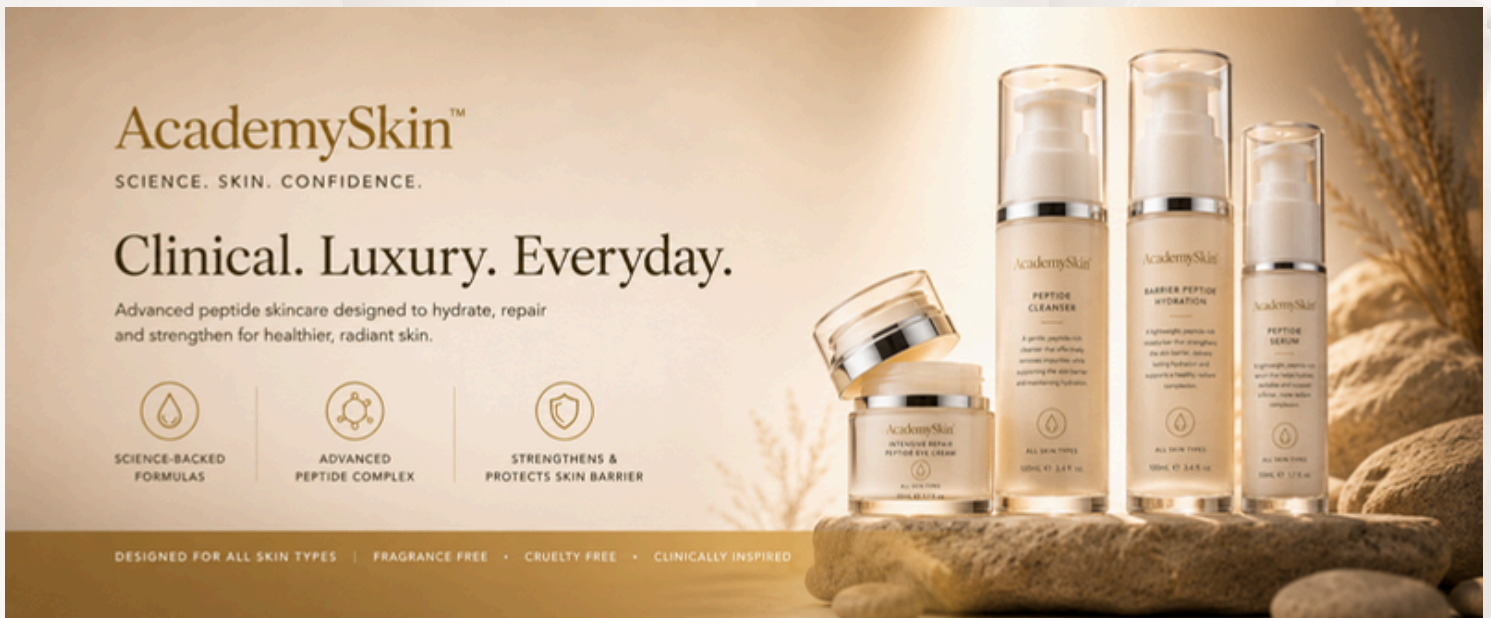

The AcademySkin™ Promise

At AcademySkin™, we believe exceptional skincare begins with exceptional standards. Every formulation is thoughtfully developed using carefully selected ingredients, manufactured in quality-controlled facilities, and created with a commitment to transparency, integrity and excellence.

Our goal is simple: to deliver luxurious, science-informed skincare that you can use with confidence.

AcademySkin™

Science. Skin. Confidence.

AcademySkin™
SCIENCE. SKIN. CONFIDENCE.

Clinical. Luxury. Everyday.

Advanced peptide skincare designed to hydrate, repair and strengthen for healthier, radiant skin.

-  SCIENCE-BACKED FORMULAS
-  ADVANCED PEPTIDE COMPLEX
-  STRENGTHENS & PROTECTS SKIN BARRIER

DESIGNED FOR ALL SKIN TYPES | FRAGRANCE FREE • CRUELTY FREE • CLINICALLY INSPIRED

AcademySkin™
INTENSIVE REPAIR PEPTIDE EYE CREAM
ALL SKIN TYPES
30g e 1.0 fl. oz.

AcademySkin™
PEPTIDE CLEANSER
A gentle peptide-rich cleanser that effectively removes impurities while supporting the skin barrier and maintaining hydration.
ALL SKIN TYPES
100mL e 3.3 fl. oz.

AcademySkin™
BARRIER PEPTIDE HYDRATION
A lightweight peptide-rich moisturizer that strengthens the skin barrier, reduces fine lines, and supports a healthy, radiant complexion.
ALL SKIN TYPES
100mL e 3.3 fl. oz.

AcademySkin™
PEPTIDE SERUM
A lightweight peptide-rich serum that helps reduce wrinkles and supports a healthy, radiant complexion.
ALL SKIN TYPES
30mL e 1.0 fl. oz.
